

Seeding some Knowledge...

You have 1000 Reputation and 5 Power  Only the first account gets a non zero start balance

(later some popular vote will decide that for you...)

Provides you with 100 Reputation

Send Proposal

Proposal:	<input type="text" value="Name"/>
Tags:	<input type="text" value="Tags"/>
IPFS-Hash:	<input type="text" value="Hash"/>

Check if Power has regenerated

(depended on block time!) Probably you need to mine a block (e.g. click "I did a great job")

Write data into the blockchain
(no type checks yet)

Submitted Proposal Proposal0

Submitted Tags SciDapp

 Displays your submitted Data (you see it after 'Refresh')

Submitted Hash Qmcpo2iLBikrdf1d6QU6vXuNb6P7hwrbNPW9kLAH8eG67z

Status

● Status of proposal is: unset, under consideration, back to revision, rejected, granted

 Check whether something has changed.

Vote On Proposals

 Display proposals of others. It takes a moment to load (4s)

Proposal: Proposal1, Tags: Awsome Research, Hash: QmYwAPJzv5CZsnA625s3Xf2nemtYgPpHdWEz79ojWnPbdG

Vote on proposal. If you vote twice it wont work (will be displayed).
